WARNING!
READ AND UNDERSTAND THIS MANUAL AND ALL INSTRUCTIONS BEFORE OPERATING THIS MOWER.
Thank You!

Congratulations on your purchase of the NEUTON® Battery-Powered Mower CE5.2 – the *Smart Mower for Small Lawns*.

The design of the NEUTON Mower CE5.2 is with state-of-the-art Battery technology to make mowing your lawn as easy and enjoyable as possible.

If you have not already ordered it, be sure to try the CE5.2’s Trimmer Attachment, too. This option makes the CE5.2 the only mower that can also trim and edge your lawn – saving you steps, plus a whole garage full of separately powered equipment.

Please visit our website at [www.neutonpower.com](http://www.neutonpower.com) or call us, toll-free, at **1-866-NEUTON1 (638-8661)** if you have any questions or difficulties as you get used to your new mower.

We also hope to hear from you on how much you like your new helper!

Thanks once again!

Tom Hughes

Congratulations on purchasing your new NEUTON Mower CE5.2, the Smart Mower for Small Lawns. The advanced technology built into your NEUTON Mower makes lawn care easy and enjoyable, year after year. As you get to know your NEUTON Mower, you will discover that it is strong, light, easy to maintain, and whisper quiet. It is clean, too, because it runs on a Battery. You will breathe easy and keep your lawn beautiful the smart fun way – with your NEUTON Mower.

These Safety & Operating Instructions explain how to set up and safely operate your new NEUTON Battery-Powered Mower, Model CE5.2. Carefully adhering to the Safety & Operating Instructions in this manual will ensure many years of productive use.

Please let us know if you have any questions. Just call Toll-Free 1-866-NEUTON1 (638-8661); our Technical Support Department will be happy to help you. When you call, please have your serial number, or order number available so we can help you quickly.

About this Manual

This manual is organized into the following chapters:

Chapter 1: Introducing the NEUTON Mower CE5.2
- Explains the organization of, and conventions used, in this manual.
- Provides contact information for NEUTON Power Equipment.

Chapter 2: Important Safety Considerations
- Describes the Safety Labels on your Mower.
- Explains guidelines for safely operating your Mower.

Chapter 3: Setting up your NEUTON Mower
- Describes the contents of the Mower package as shipped.
- Explains how easy the Mower is to set up.
- Describes and explains the Mower’s features and controls.

Chapter 4: Operating your NEUTON Mower
- Provides instructions for starting and stopping your Mower.
- Explains how to adjust the Mower’s Cutting Height.
- Offers useful tips when using your Mower to care for your lawn.

Chapter 5: Charging and caring for the Battery
- Explains how to use and care for the Battery that powers your NEUTON Mower.

Chapter 6: Optional Attachments
- Describes the Attachments available for use with your NEUTON Mower, and how to use them.

Chapter 7: Maintaining and storing your NEUTON Mower
- Provides tips on maintaining your Mower.
- Describes how to best store your Mower.

Chapter 8: Troubleshooting Tips
- Lists common problems and their solutions.

In addition to these chapters, the manual includes a Parts List, Schematic Drawings of the NEUTON Mower, a section for your notes, the Warranty, and a Check List of daily maintenance procedures (on the back cover) to help you keep your Mower performing well for years to come.
Conventions used in this Manual

⚠️ WARNING!
THIS INDICATES A HAZARDOUS SITUATION, WHICH, IF NOT AVOIDED, COULD RESULT IN DEATH OR SERIOUS INJURY.

⚠️ CAUTION!
THIS INDICATES A HAZARDOUS SITUATION, WHICH, IF NOT AVOIDED, COULD RESULT IN MINOR OR MODERATE INJURY.

NOTICE
THIS INFORMATION IS IMPORTANT IN THE PROPER USE OF YOUR MOWER. FAILURE TO FOLLOW THIS INSTRUCTION COULD RESULT IN DAMAGE TO YOUR MACHINE OR PROPERTY.

TIP
This is a helpful hint to guide you in getting the most out of your NEUTON Mower.

NOTE: This information may be helpful to you in using your Mower.

Tools Needed: This indicates you will need a special tool to perform a maintenance function on your Mower.

NOTE: Neuton Power Equipment reserves the right to discontinue, change, and improve its products at any time without notice or obligation to the purchaser. The descriptions and specifications contained in this manual were in effect at printing. Equipment described within this manual may be optional. Some illustrations may not be applicable to your machine.
Chapter 2: Important Safety Considerations

We want you to enjoy years of safe and productive use from your NEUTON Battery-Powered Mower. We do not want you to have injuries, so please take a few moments to read the following instructions for safely operating your new machine.

Please read these instructions before using your Mower.

Safety and Information Labels

You will find the following two labels on your NEUTON Mower.

NEUTON Mower Warning and Safety Instructions Label (237681)  
Mower Danger Label (237561)

The following label appears on your NEUTON Battery.

NEUTON Battery operating tips label. (237651)
Protecting Yourself and Those around You

Tragic accidents can occur if the operator is not alert to the presence of children. Children are often attracted to the Mower and the activity of mowing or trimming. Never assume that children will remain where you last saw them.

**WARNING!**

- **THIS CUTTING MACHINE IS CAPABLE OF AMPUTATING HANDS AND FEET, AND THROWING OBJECTS. FAILURE TO OBSERVE THE FOLLOWING SAFETY INSTRUCTIONS COULD RESULT IN SERIOUS INJURY OR DEATH.**
- **BE SURE THE AREA IS CLEAR OF OTHER PEOPLE BEFORE MOWING OR TRIMMING. NEVER ALLOW CHILDREN, OTHER BYSTANDERS, OR PETS IN YOUR WORK AREA WHEN OPERATING THE MOWER OR TRIMMER. STOP THE MACHINE IF ANYONE ENTERS THE AREA.**
- **KEEP CHILDREN OUT OF THE WORK AREA AND UNDER THE WATCHFUL CARE OF A RESPONSIBLE ADULT.**
- **BE ALERT AND TURN THE MACHINE OFF IF CHILDREN ENTER THE AREA.**
- **ONLY ALLOW RESPONSIBLE INDIVIDUALS WHO HAVE A THOROUGH UNDERSTANDING OF THESE INSTRUCTIONS TO OPERATE THE MOWER OR TRIMMER. NEVER ALLOW CHILDREN TO OPERATE THE MACHINE.**
- **BEFORE AND WHILE PULLING THE MACHINE BACKWARDS, LOOK BEHIND AND DOWN FOR SMALL CHILDREN AND FOR SECURE FOOTING.**
- **USE EXTRA CARE WHEN APPROACHING BLIND CORNERS, SHRUBS, TREES, OR OTHER OBJECTS THAT MAY OBSCURE YOUR VISION.**
- **IF YOU ARE EVER UNSURE ABOUT AN ACTION YOU ARE ABOUT TO TAKE, PLEASE DO NOT DO IT.**

**Dressing Appropriately**

**WARNING!**

- **ALWAYS WEAR PROTECTIVE GOGGLES OR SAFETY GLASSES WITH SIDE SHIELDS WHEN USING YOUR NEUTON MOWER OR TRIMMER TO PROTECT YOUR EYES FROM POSSIBLE THROWN OBJECTS. USE A FACE OR DUST MASK WHEN OPERATING IN DUSTY CONDITIONS.**
- **WEAR SHOES WITH NON-SLIP TREADS WHEN USING YOUR MACHINE. IF YOU HAVE SAFETY SHOES, WEAR THEM. DO NOT USE THE MOWER OR TRIMMER WHILE BAREFOOT OR WEARING OPEN SANDALS.**
- **WEAR LONG PANTS WHILE TRIMMING AND MOWING.**
- **AVOID WEARING LOOSE CLOTHING OR JEWELRY, WHICH MIGHT CATCH ON THE MACHINE’S MOVING PARTS.**
Preparing to Use Your Mower or Trimmer

**WARNING!**

- READ, UNDERSTAND, AND FOLLOW ALL INSTRUCTIONS ON THE MACHINE AND IN THE MANUAL. BE THOROUGHLY FAMILIAR WITH THE CONTROLS AND THE PROPER USE OF THE MOWER AND TRIMMER BEFORE STARTING.

- NEVER OPERATE THE NEUTON MOWER OR TRIMMER WITHOUT THE PROPER GUARDS, SAFETY SWITCHES, OR OTHER SAFETY AND PROTECTIVE DEVICES IN PLACE AND PROPERLY CONNECTED. INSPECT THE MACHINE AND CUTTING BLADE (CORD) TO DETERMINE PROPER INSTALLATION OF THESE DEVICES, AND THEY ARE IN GOOD REPAIR, AND OPERATE PROPERLY. IF THE CONDITION OR OPERATION OF THESE DEVICES IS QUESTIONABLE, YOU MUST REPAIR THEM OR REPLACE THEM BEFORE USING THE MACHINE.

- FOLLOW THE INSTRUCTIONS FOR THE PROPER INSTALLATION AND OPERATION OF ACCESSORIES. USE ONLY ACCESSORIES APPROVED BY THE MANUFACTURER. DO NOT ALTER ANY ASPECT OF THE MOWER, ATTACHMENTS, OR ACCESSORIES IN ANY WAY. MODIFYING OR CHANGING YOUR MOWER OR ITS ATTACHMENTS AND ACCESSORIES IN ANY WAY COULD CAUSE PERSONAL INJURIES AND PROPERTY DAMAGE, AND WILL VOID YOUR WARRANTY.

- THOROUGHLY INSPECT THE AREA WHERE YOU WILL BE USING THE MOWER OR TRIMMER, AND REMOVE ALL STONES, LAWN TOYS, WIRE, BONES, STICKS, PET SUPPLIES, AND ANY OTHER FOREIGN OBJECTS WHICH COULD BE PICKED UP AND THROWN BY THE MOWER BLADE OR TRIMMER CORD. OBJECTS STRUCK BY THE MOWER BLADE OR TRIMMER CORD CAN CAUSE SERIOUS INJURIES. ALSO, NOTE THE LOCATION OF HOLES, RUTS, BUMPS, STUMPS, AND OTHER POSSIBLE HAZARDS TO AVOID.

- NEVER TURN THE MOWER OVER WHILE THE MOTOR IS RUNNING. THE BLADE MAY THROW OBJECTS OR COME LOOSE AND CAUSE INJURY.

- MOW OR TRIM ONLY IN DAYLIGHT OR IN AN AREA WELL LIT BY ARTIFICIAL LIGHT.

- DO NOT CHARGE THE MOWER BATTERY IN WET OR RAINY CONDITIONS.
Operating Your Mower or Trimmer Safely

Your Mower can operate as a Discharging, Mulching, or Bagger Mower. Learn how to use the Side Discharge Chute, Mulching Plug, and Rear Bagger as appropriate.

⚠️ WARNING! ⚠️

- ALWAYS STOP THE MOTOR, WAIT FOR THE BLADE OR CORD TO STOP MOVING, AND REMOVE THE SAFETY KEY WHENEVER YOU LEAVE THE OPERATING POSITION (BEHIND THE HANDLEBAR) FOR ANY REASON. IN ADDITION, REMOVE THE BATTERY WHEN INSPECTING AND CLEANING THE MACHINE, PERFORMING ROUTINE MAINTENANCE, CLEARING GRASS, MAKING ADJUSTMENTS, AND ATTACHING OR REMOVING ACCESSORIES.
- NEVER INSERT THE SAFETY KEY INTO THE MOWER UNTIL YOU ARE READY TO OPERATE THE MOWER. STORE THE SAFETY KEY AWAY FROM CHILDREN AND PEOPLE NOT AUTHORIZED TO USE THE MOWER.
- THE CUTTING BLADE OR CORD ALWAYS TURNS WHEN THE MOTOR IS RUNNING. LEARN HOW TO QUICKLY STOP THE MACHINE’S MOTOR – SIMPLY RELEASE THE ORANGE CONTROL BAR. REMEMBER THAT THE BLADE OR CORD WILL CONTINUE TO ROTATE FOR UP TO THREE (3) SECONDS AFTER YOU RELEASE THE ORANGE BAR.
- DO NOT PUT YOUR HANDS OR FEET NEAR OR UNDER THE ROTATING BLADE OR CORD. KEEP CLEAR OF THE DISCHARGE AREA AT ALL TIMES.
- NEVER OPERATE THE MOWER OR TRIMMER IN THE RAIN OR WHEN THE GRASS IS WET. ALWAYS BE SURE OF YOUR FOOTING.
- KEEP A FIRM HOLD ON THE HANDLEBAR, AND WALK – NEVER RUN.
- STAY ALERT AND WATCH WHAT YOU ARE DOING.
- WATCH OUT FOR TRAFFIC WHEN MOWING OR TRIMMING NEAR ROADWAYS.
- STOP THE MOTOR WHEN CROSSING OVER LOOSE MATERIALS SUCH AS GRAVEL DRIVES, WALKS, OR ROADS, AS OBJECTS DISCHARGED BY THE MOWER OR TRIMMER CAN BE HAZARDOUS.
- DO NOT OPERATE THE MACHINE WHEN YOU ARE TIRED OR UNDER THE INFLUENCE OF MEDICATION, DRUGS, OR ALCOHOL.
- REMOVE THE SAFETY KEY WHEN THE MACHINE IS NOT IN USE.

⚠️ CAUTION! ⚠️

- KEEP THE BLADE CUTTING EDGES SHARP AND CLEAN FOR THE BEST AND SAFEST PERFORMANCE. KEEP ALL NUTS, BOLTS, AND SCREWS TIGHT TO BE SURE THE MOWER IS IN SAFE OPERATING CONDITION. FOLLOW THE INSTRUCTIONS IN THIS MANUAL FOR CHANGING ACCESSORIES.
- NEVER PULL THE MOWER OR TRIMMER TOWARD YOU WHILE CUTTING GRASS. BY DESIGN, YOU SHOULD ONLY PUSH THE NEUTON MOWER OR TRIMMER FORWARD WHILE CUTTING.
- USE EXTREME CAUTION WHEN MANEUVERING BACKWARDS. ALWAYS STOP THE MOTOR, LOOK FIRST TO CHECK YOUR FOOTING, LOOK DOWN AND BEHIND YOU BEFORE MOVING BACKWARDS.
- IF YOU STRIKE A FOREIGN OBJECT, OR IF THE MOWER OR TRIMMER VIBRATES ABNORMALLY, STOP THE MOTOR, REMOVE THE SAFETY KEY, AND INSPECT THE MACHINE FOR ANY DAMAGE. REPAIR THE DAMAGE BEFORE RESTARTING AND OPERATING THE MACHINE.
  NOTE: Excessive vibration is generally a sign of trouble.
- DO NOT USE YOUR NEUTON MOWER OR TRIMMER FOR ANY JOB OTHER THAN THE INTENDED USE.
- ONLY USE THE TRIMMER FOR TRIMMING GRASS, WEEDS, AND OTHER VEGETATION.
- DO NOT OPERATE THE MACHINE IF IT DOES NOT START NORMALLY OR STOP NORMALLY WHEN YOU RELEASE THE CONTROL BAR.
- EMPTY THE REAR BAGGER OF ALL DEBRIS FOLLOWING EACH USE. THE FABRIC WILL WEAR AND DETERIORATE UNDER NORMAL USAGE. BEFORE EACH USE, CHECK THE BAGGER FOR WEAR AND REPLACE IF IT IS TORN, OR WORN.
Handling the Battery Safely

![WARNING!]

- NEVER CHARGE THE LAWN MOWER BATTERY IN THE RAIN OR IN WET CONDITIONS.
- USE ONLY AN APPROVED 24-VOLT NEUTON CHARGER TO CHARGE THE BATTERY. MAKE SURE THAT THE NEUTON CHARGER OUTPUT VOLTAGE PRINTED ON THE CHARGER LABEL MATCHES THE VOLTAGE OF YOUR BATTERY. USE OF A DIFFERENT CHARGER MAY NOT ALLOW THE BATTERY TO FULLY RECHARGE AND MAY CAUSE A FIRE OR EXPLOSION. USE OF A NON-APPROVED NEUTON CHARGER WILL VOID YOUR WARRANTY.
- EXERCISE CARE IN HANDLING THE BATTERY IN ORDER NOT TO SHORT-CIRCUIT IT WITH CONDUCTING MATERIALS SUCH AS RINGS, BRACELETS, AND KEYS. WHEN SHORT-CIRCUITED, THE BATTERY OR CONDUCTOR MAY OVERHEAT AND CAUSE BURNS.
- NEVER ATTEMPT TO ALTER OR OPEN THE BATTERY. OPENING YOUR BATTERY WILL VOID YOUR WARRANTY AND COULD RESULT IN AN UNSAFE CONDITION OR RISK OF PERSONAL INJURY. USE NORMAL HOUSEHOLD VOLTAGE (110 VOLTS) WHEN CHARGING THE BATTERY. PLUG THE CHARGER DIRECTLY INTO THE ELECTRICAL OUTLET.
- NEVER ATTEMPT TO REPLACE THE INDIVIDUAL BATTERY CELLS INSIDE THE BATTERY. MIXING FRESH AND DISCHARGED BATTERIES COULD INCREASE INTERNAL CELL PRESSURE AND RUPTURE THE DISCHARGED BATTERY. IMPROPER WIRING WITHIN THE BATTERY COULD RESULT IN LEAKAGE OR EXPLOSION.
- NEVER DISPOSE OF BATTERIES IN A FIRE, AS THE BATTERY CELLS MAY EXPLODE. NEVER OPEN OR MUTILATE THE BATTERY. RELEASED ELECTROLYTE (BATTERY ACID) IS CORROSIVE AND WILL CAUSE DAMAGE TO EYES, SKIN, OR CLOTHES. BATTERY ACID IS TOXIC IF SWALLOWED OR IF THE FUMES ARE INHALED.
- NEVER THROW AWAY USED BATTERIES IN YOUR HOUSEHOLD TRASH. BRING THEM TO A RECYCLING CENTER OR HOUSEHOLD HAZARDOUS WASTE DEPOT FOR PROPER DISPOSAL. PLEASE REFER TO “RECYCLING YOUR USED BATTERY” ON PAGE 31 FOR MORE INFORMATION.

**NOTE:** See additional details on Battery care in “Chapter 5: Charging and Caring for the Battery”.

No list of Warnings and Cautions can be all-inclusive. If situations occur not covered by this manual, the operator must apply common sense and operate the NEUTON Mower or Trimmer in a safe manner. Visit our website at www.neutonpower.com or call 1-866-NEUTON1 (638-8661) for assistance.
Chapter 3: Setting Up Your NEUTON Mower

This chapter outlines a few simple steps needed to set up your new Mower. Before beginning assembly, it may be helpful to familiarize yourself with the controls and features on your Mower by reviewing the photograph of the Mower on page 19 (Figure 22) and reading about the Mower’s controls and features.

Please check that you have all of the components listed below. If anything is missing, please visit our website at www.neutonpower.com or call Neuton Power Equipment Toll-Free at 1-866-NEUTON1 (638-8661).

NEUTON Mower Package Checklist

NEUTON Power Equipment ships the following items (Figure 1 on page 10) in your Mower package. Please check to make sure you have everything listed below:

- NEUTON CE5.2 Battery-Powered Mower
- Upper Handlebar Assembly
- (2) Green Quick-Connect Knobs w/Lock Washers used to connect the Lower Handlebars to the Mower.
- (2) Lower Handlebars with two (2) Black Connector Knobs attached (used to connect the Upper and Lower Handlebars together).
- Side Discharge Chute w/Handle
- Rear Bagger
- Mulching Plug
- Battery (inside the Mower)
- Battery Charger
- Safety Key
- 36mm Wrench (to remove the Blade)
- NEUTON CE5.2 Battery-Powered Mower Safety & Operating Instructions Manual

Assembling Your NEUTON Mower

To allow you to quickly begin using your NEUTON Mower, it shipped to you partially assembled. The assembly process is easy and does not require any special tools, knowledge, or strength.

Assembling your NEUTON Mower takes just a few steps:

**Step 1:** Read the *Safety & Operating Instructions* before proceeding

**Step 2:** Remove the Battery

**Step 3:** Charge the Battery before your first use

**Step 4:** Attach the Low Handlebar Sections

**Step 5:** Attach the Upper Handlebar Assembly

**Step 6:** Attach the Cable to the Handlebar Assembly

**Step 7:** Attach the Side Discharge Chute, Mulching Plug, or Rear Bagger

**Step 8:** Insert the Battery after being fully charged

Each of these steps is described in detail below: (See *Figure 22* on page 19 for a photograph of the fully assembled Mower)

---

**WARNING!**

THE SAFETY KEY, WITH ITS BUILT-IN CIRCUIT BREAKER, AS WELL AS THE BATTERY, SHOULD NEVER BE INSERTED DURING ASSEMBLY, ADJUSTMENTS, CLEANING, BLADE REPLACEMENT, OR WHEN THE MOWER IS NOT IN USE. REMOVING THE SAFETY KEY WILL PREVENT ACCIDENTAL STARTING, AND HELP AVOID SERIOUS PERSONAL INJURY.

---

**Step 1: Read the *Safety & Operating Instructions* before proceeding**

The NEUTON Mower is a motorized cutting machine that uses a sharp Blade. For your safety, and for best results, it is important to read the information in “Chapter 2: Important Safety Considerations” before you assemble or use the Mower.

To familiarize yourself with the assembly, features, and operation of your Mower, please read the remainder of this manual before proceeding.

**NOTE:** Do not discard the shipping box and packaging material until you are fully satisfied with your new NEUTON Battery-Powered Mower.
Step 2: Remove the Battery

You can quickly and easily remove the Battery from your Mower.

1. Open the Battery Cover (*Figure 2*).
   - Press down on the Mower body next to the Battery Cover Handle before pulling the Cover open.

2. Turn the Battery Retainer Arm until it is no longer blocking the Battery (*Figure 3*).
   - To help keep the Mower from rolling while removing the Battery, put one foot behind a wheel for stability.

3. Pull the Battery straight up and remove it.

---

Step 3: Charge the Battery before Your First Use

You MUST charge the Battery for twenty (20) to thirty (30) hours before you use the Mower for the first time. If you do not charge it before using the Mower, the Battery’s charging capacity may decrease.

For instructions on removing and charging the Battery, read “Chapter 5: Charging and Caring for the Battery” before you operate the Mower.

Step 4: Attach the Lower Handlebar Sections

To keep the Mower from moving while you assemble it, place your foot behind one of the wheels.

**NOTE:** You will use the green Quick-Connect Knobs to attach the Lower Handlebar sections to the Mower. Install both handlebars the same way.

1. Set the Cutting Height Lever (*Figure 4*) to the highest adjustment (position 6 as molded into the Mower body). This makes it easier to reach the slots on the Mower frame.

---

![Figure 2](image1.png)  
*Figure 2*

![Figure 3](image2.png)  
*Figure 3*

![Figure 4](image3.png)  
*Figure 4*
2. Position the Lower Handlebar with the smooth side against the frame of the Mower. Slide it down fully into the slot on the frame until the holes line up (Figure 5).

**NOTE 1:** Place the Lower Handlebar with the cord clip on the right side (viewed from the Operator's position behind the Handlebar) of the Mower.

**NOTE 2:** Be sure you slide the Handlebar all the way down to the bottom of the slot. When you do this, the cutout notch on the end of the Handlebar aligns with the base of the channel in the Mower's frame.

3. Insert a green Quick-Connect Knob with a Lock Washer through the lined-up holes on the Handlebar and Mower frame (Figure 6). Turn the Knob clockwise until firmly snug. Repeat this step for the other side.

---

**NOTICE**

BE SURE TO TIGHTEN THE GREEN QUICK-CONNECT KNOBS BY HAND. DO NOT USE A TOOL TO TIGHTEN THEM; YOU COULD EASILY OVER TIGHTEN THEM AND DAMAGE THE PARTS.

---

**Step 5: Attach the Upper Handlebar Assembly**

**NOTE:** You will use the black Connector Knobs and Bolts (already attached to the Lower Handlebars) to connect the Upper and Lower Handlebar sections together.

1. Remove the black Connector Knobs and Connector Bolts from the upper ends of the Lower Handlebars.

**TIP**

Let the Upper Handlebar Assembly lean on the ground during this process (Figure 7). It is easier to start with the Upper Assembly in this position, so you don’t have to hold and balance it while connecting the sections. Once you have the Handlebars loosely connected, you can swing the Upper Assembly into place and tighten it further (Figure 8) on page 14.
2. Line up the holes of the Upper Handlebar Assembly with the holes in the Lower Handlebar sections.

**NOTE:** There are three (3) height positions (holes in the Upper Handlebar) for the Upper Handlebar Assembly. Connect the Upper and Lower Handlebar sections together using the appropriate holes at a height that is most comfortable for you.

3. Slide the Connector Bolts (from the inside of the Handlebars, outward) through the predetermined holes in the Upper and Lower Handlebar sections on each side of the Mower and lightly screw on the black Connector Knobs just enough to hold the Upper and Lower Handlebar sections together.

4. Swing the Upper Handlebar Assembly into an upright position so that the Upper and Lower Handlebars line up and slide into place (Figure 8). Tighten the black Connector Knobs by hand until they are snug.

5. Check the length the Handlebar for comfort. If necessary, reconnect the Upper and Lower (up or down) to a height that is best for you.

To save space for storage, you can loosen these black Connector Knobs to move the Upper Handlebar Assembly forward onto the Mower’s Deck.

**Step 6: Attach the Cable to the Handlebar Assembly**

1. Run the Cable through the Cord Clip (Figure 9) on the right Lower Handlebar section.

2. Align the Half-Moon Cutout in the Cable End (Figure 10) with the Cable Housing on the Handlebar, and slide them together.

3. Tighten the Locking Nut by hand to connect the Cable (Figure 11) with the Housing.
Step 7: Attach the Side Discharge Chute, Mulching Plug, or Rear Bagger

**Side Discharge Chute**

The Side Discharge Chute ([Figure 12](#)) allows for proper discharge of the grass, which prevents clogging. The Chute shipped without the Handle so you will have to install the Handle prior to use using a small Phillips Screwdriver.

1. Raise the hinged Discharge Guard on the back of the Mower ([Figure 12a](#)).

2. Orient the Discharge Chute as shown in [Figure 12b](#). Position the top front groove of the Chute over the Support Rod ([Figure 12a](#)) and lower the Chute into place ([Figure 12b](#)).

3. Lower the hinged Discharge Guard.

**Mulching Plug**

To mulch your grass, install the Mulching Plug.

1. If necessary, remove the Rear Bagger or Side Discharge Chute from the Mower.

2. Install the Mulching Plug ([Figure 13](#)). Be sure to push the Plug all the way in until the Notch in its bottom is engaged.

   ![Figure 13](#) Engage Notch

   **TIP**

   There’s a slight knack to installing the Plug; push the Plug in with a slightly arcing motion as follows:

   - Align the Plug in the Mower.
   - Start to push the top of the Plug in first.
   - Then put pressure towards the bottom and slide in the Plug.
**Rear Bagger**

The NEUTON Rear Bagger lets you cut and catch your grass clippings, eliminating the need to rake. The Rear Bagger easily attaches to the rear of the Mower (Figure 14). The Bagger is shipped unassembled. The following instructions outline the steps necessary to assemble, install, and remove the Bagger.

**Assembling the Bag to the Bag Frame**

1. With the Bottom Stiffener Board facing down, insert the Frame into the Bag (Figure 15).

2. Snap the Bag Clips around the Frame top, sides and bottom (Figures 16a – 16d) to secure the Bag to the Frame.
Installing the Bagger

1. Raise the Discharge Guard on your Mower (Figure 17) and note the metal Support Rod at the rear of the Mower.

2. Grasp the Bagger by the Top Handle (Figure 18) and center it at the back of the Mower.

3. Align the Metal Latch Hooks (Figure 18) over the Support Rod (Figure 19) and lower the Bagger in place until the Wire Frame at the bottom of the Bagger rests on the Mower.

4. Lower and close the Discharge Guard.

Removing and Emptying the Bagger

1. Raise the Discharge Guard.

2. Using the Top Handle of the Bagger, lift the Bagger off the Support Rod and away from the Mower.

3. Lower the Discharge Guard.

4. To empty the Bagger, tilt the Top Handle forward. Use the Cloth Handle (Figure 20) at the rear of the Bagger to move the contents toward the front as you empty the Bagger.
Step 8: Insert the Battery after Being Fully Charged

1. Orient the Battery as shown in Figure 21a. Align the black side of the Battery with the side of the Mower housing where the label reads “Insert Battery with the black side along this edge.”

**NOTE:** The indentations on the bottom of the Battery must line up with the metal tabs in the bottom of the Battery compartment. A new replacement Battery now has a gold faceplate (originally black as seen in Figures 21a and 21b below).

2. After confirming the correct orientation of the Battery, insert the Battery fully into the Battery compartment.

3. Turn the Battery Retainer Arm back over on top of the Battery to secure it in place (Figure 21b).

**NOTICE**

*IF THE BATTERY IS NOT ORIENTED CORRECTLY, IT WILL NOT FULLY DEPRESS INTO THE OPENING. IF THIS HAPPENS, REMOVE THE BATTERY, RECHECK THE ORIENTATION, AND TRY AGAIN.*
Your Fully Assembled NEUTON Mower

Figure 22
Controls and Features

Make certain that you are familiar with the Controls, Parts, and operation of your NEUTON Mower before using it.

⇒ Safety Key Slot

The Safety Key Slot is for the Safety Key.

⇒ Safety Key

The Safety Key, after you insert it into the Mower, allows the Motor to start and run. You can insert the Safety Key either way – it has no front or back. You should remove the Safety Key when not in use.

The Safety Key has a Built-In Circuit Breaker to protect the Motor.

**NOTE:** If the Built-In Circuit Breaker trips, the white Button on top of the Safety Key will pop up. Before attempting to restart the Mower, push the white Button all the way down until it locks into place.

⇒ Start Knob

The orange Start Knob is a safety feature that you must push across to the left before the Control Bar can be depressed.

⇒ Control Bar

The orange Control Bar is a safety feature. You must squeeze the Bar into the Handlebar for the Motor to start and run, and the Cutting Blade to spin. When the Control Bar is released, the Motor shuts off and the Blade stops spinning within three (3) seconds.

⇒ Mower/Auxiliary Switch

The Mower/Auxiliary Switch controls the optional Mower attachments. This Switch has two (2) settings.

- Mower (rear position), used for normal mowing, and
- Auxiliary (forward position), used when operating an attachment. For more information about options available for your NEUTON Mower, see “Chapter 6: Optional Attachments”.
Status Indicator Light

The green Status Indicator Light on the Lower Crossbar (Figure 23) lights up when you install a charged Battery and insert the Safety Key.

**NOTE:** A green Status Indicator Light does not guarantee that the Battery is fully charged, only that it has some charge, the Safety Key has been inserted, the electrical system is ready, and that the Mower can be started.

---

**NOTICE**

**IF THE GREEN STATUS INDICATOR LIGHT GOES OUT, DO NOT OPERATE THE MOWER AGAIN UNTIL THE BATTERY IS FULLY CHARGED. IF YOU DO, THIS WILL RESULT IN DECREASED CHARGING CAPACITY.**

---

**NOTE:** Although you may notice that a short period of rest may restore the Status Indicator Light, you still must fully charge the Battery before continuing to mow. For best results, be sure to always fully charge the Battery after every use.

---

Cutting Height Lever

The Cutting Height Lever (Figure 24) allows you to easily adjust how high or low you cut the grass. Notice that there are six (6) different Height Positions etched into the Mower body.

To easily move the Cutting Height Lever, hold the Handlebar with your right hand to keep the Mower steady and adjust the Lever with your left hand.

To easily adjust this Lever, pull the Lever out before lifting or lowering it. Once you pull the Lever out, it very easily adjusts to a different level.

---

Mower/Auxiliary Switch

The Mower/Auxiliary Switch (Figure 25) controls the optional Mower attachments. This Switch has two (2) settings.

- Mower (rear position), used for normal mowing, and
- Auxiliary (forward position), used when operating an attachment. For more information about options available for your NEUTON Mower, see “Chapter 6: Optional Attachments”.

---

Figure 23

Figure 24

Figure 25
Neuton CE5.2 Product Specifications

Motor
- RPM: 4300
- Tip Speed: 16,000 ft./min.
- AMP Idle: 4 – 5
- AMP Cutting: 8 – 10
- Size: 500W, 24V DC/32 Amp
- Noise: Under 80 Decibels

Controls
- Start/Stop: Safety Control Bar
- Shape: Ergonomically Designed
- Key: Removable Safety Key w/Circuit Breaker
- Electric System: Electro-mechanical Relay

Housing
- Material: Injected Polypropylene
- Handlebar Height Adjustment (at lowest housing height setting): 35" - 37"
- Wheels, Front: 7" x 1.6", Molded Rubber Tread
- Wheels, Rear: 8" x 1.9", Molded Rubber Tread
- Weight: 48 lbs. (including Battery), 33 lbs. (without Battery)
- Housing Length: 30"
- Housing Width: 18"
- Housing Height: 12.5"

Cutting
- Cutting Deck Width: 14.2"
- Blade: 14" Aero Blade
- Blade Nut Torque: 16.6 ft-lbs.
- Cutting Height: Adjustable from 1.2" - 3.0"
- Discharge Chute: Included
- Bagger: Included
- Bagger Capacity: 1 Bushel (1.26 cubic ft.)
- Mulching Plug: Included
- Trimming: Optional Attachment
- Blade Sharpener: Optional Accessory

Battery
- Voltage: 24V DC
- AMP: 10 Amp-Hour
- Type: Sealed, Lead/Acid
- Weight: 15 lbs.
- Approximate Run Time: 45 - 60 minutes for fully charged Battery
- Battery Charger: Included. 24Volt Charger, plugs into standard electrical outlet
- Charge Time: 20 – 30 Hours

Meets CPSC Mower Safety Standards
Chapter 4: Operating Your NEUTON Mower

This chapter explains how to Start, Stop, and adjust the Cutting Height of your Mower.

**NOTE:** If the Mower Battery is not fully charged or if you are unpacking a new Mower for the first time, read “Chapter 5: Charging and Caring for the Battery” before operating the Mower. You should charge the Battery for twenty (20) to thirty (30) hours before use.

### Pre-Start Checks

**WARNING!**

DO NOT INSERT THE SAFETY KEY UNTIL YOU HAVE COMPLETED ALL OF THE PRE-START CHECKS AND YOU HAVE MOVED THE MOWER TO THE AREA THAT YOU ARE GOING TO MOW.

Perform the following checks each time before operating your Mower.

- Check under the Mower Deck and make sure that the Blade is attached securely. Inspect for any visible damage to the Blade or Deck, and remove any accumulation of dirt, dust, or dried grass clippings.

- Make sure all Knobs, Bolts, Attachments, Guards, and Covers are in place and securely attached.

- Attach the Side Discharge Chute, the Rear Bagger, or the Mulching Plug.

- Set the Mower to the desired Cutting Height. See “Adjusting the Cutting Height” on page 24 for details.

- Be sure the Battery is fully charged.

- Be sure to set the Mower/Auxiliary Switch to “Mowing” (the “Mowing” side of the switch, toward you, is pushed down).

- Push the Mower (before starting it) to the lawn area that you wish to mow.

**NOTE:** The length of time that a Battery can hold a charge while mowing depends upon lawn conditions; tall or thick grass makes the Mower work harder causing the Battery to discharge faster.
Adjusting the Cutting Height

Using the Cutting Height Lever (Figure 26), adjust the Cutting Height so that you cut off only one (1) to two (2) inches of grass at a time.

1. Remove the Safety Key.
2. Make sure all four (4) Wheels are level.
3. Pull the Cutting Height Lever (toward the Wheel) out of its present position Notch. The Cutting Height Lever is spring-loaded.

To easily move the Cutting Height Lever, hold the Handlebar with your right hand to keep the Mower steady and adjust the Lever with your left hand.

4. Move the Lever to any one (1) of the six (6) Cutting Height Settings.

Each position adjusts the Mower’s Blade level to a different Cutting Height. Pulling the Cutting Height Lever up towards Position 1 cuts more grass (which leaves your grass shorter); pushing the Lever down towards Position 6 cuts less grass (leaving your grass longer).

The following table lists the final cut grass heights.

<table>
<thead>
<tr>
<th>Lever Position</th>
<th>Cut Height</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>1.2” (30 mm)</td>

Mowing on Slopes

Slopes are a major factor related to slip-and-fall accidents, which can result in severe injury. All slopes require caution. If you feel uneasy on a slope, do not mow it.

Always:
- Use caution on slopes. Whenever possible, mow across the face of slopes, not up and down. Exercise caution when changing direction on slopes.
- Remove objects such as rocks and tree limbs, or any other potential object possibly thrown by the Mower Blade. Objects struck by the Mower Blade can cause severe injuries.
- Watch for holes, ruts, or bumps. Tall grass can hide obstacles.

Never:
- Never mow near drop-offs, ditches, or embankments. You could lose your footing or balance.
- Never mow steep slopes or any other areas where stability or traction is in doubt.
- Never mow on wet grass. Unsure footing could cause you to slip.
Starting the Motor and Engaging the Blade

NOTICE

- STARTING, STOPPING, AND RESTARTING AN ELECTRIC MOTOR REPEATEDLY WITHIN A FEW SECONDS CAN GENERATE A GREAT DEAL OF HEAT AND DAMAGE THE MOTOR. TO PROTECT THE LIFE OF YOUR NEUTON MOWER, ALWAYS WAIT AT LEAST FIVE (5) SECONDS AFTER STOPPING BEFORE RESTARTING THE MOWER.

- THE CUTTING BLADE ALWAYS TURNS WHEN THE MOTOR IS RUNNING; THERE IS NO CLUTCH TO ALLOW THE BLADE TO STOP ROTATING WHILE THE MOTOR IS RUNNING.

1. Perform the Pre-Start Checks listed previously.
2. Insert the Safety Key into the Key Slot (Figure 27). You can insert the Safety Key either way. The green Status Indicator Light on the Lower Crossbar should come on.

Starting the Mower

1. Slide the orange Start Knob to your left (Figure 28).
2. Squeeze and hold the orange Control Bar (Figure 29). The orange Start Knob fits snugly into the Slot on top of the Handlebar.
3. Continue to hold the Control Bar against the Handlebar for as long as you want the Motor to run.

If the Mower does not start, first check for simple solutions:

- Make sure the Battery is in, the Safety Key is in, and the Status Indicator Light is green.
- Make sure the Mower/Auxiliary Switch is in the Mower position.
- Make sure the white Circuit Breaker Button on the Safety Key is depressed.
- Did you follow the two (2)-step Start sequence: slide the orange Start Knob to the left, then squeeze and hold the Control Bar?

NOTE: If the Mower still does not start, follow the steps in “Chapter 8: Troubleshooting Tips”.

WARNING!

THE ORANGE CONTROL BAR IS A SAFETY DEVICE; DO NOT TAMPER WITH IT.
Stopping the Motor and Blade

Simply releasing the orange Control Bar stops the Motor and Blade.

⚠️ WARNING!

THE BLADE CONTINUES TO ROTATE FOR A FEW SECONDS AFTER YOU SHUT OFF THE MOTOR.

When Finished Mowing

- Remove the Safety Key when the Mower is unattended.
- Remove the Battery when the Mower is unattended.
- Remember to recharge the Battery after each use; no matter how short a time you used it. See “Charging the Battery” on page 28 for details.

⚠️ WARNING!

YOU SHOULD NEVER HAVE THE SAFETY KEY WITH ITS BUILT-IN CIRCUIT BREAKER AND THE BATTERY INSERTED DURING ADJUSTMENTS OR BLADE REPLACEMENT. REMOVING THE SAFETY KEY WILL PREVENT ACCIDENTAL STARTING, AND HELP AVOID SERIOUS PERSONAL INJURY.

Mowing and Lawn Care Tips

- For the best mowing results, mow at a steady pace. If you try to walk too quickly, especially in tall or thick grass, the quality of the cut may not be uniform. To avoid damage and extend Battery life, always mow at a pace allowing the Motor to run smoothly.
- The length of time that the Battery can hold a charge while mowing depends upon lawn conditions; tall, thick, or damp grass make the Mower work harder, causing the Battery to discharge faster. Under normal mowing conditions, the run time is between forty-five (45) and sixty (60) minutes. To mow longer, consider purchasing a second Battery and keep it fully charged.
- Before starting the Mower, adjust the Cutting Height so that you only cut one (1) to two (2) inches of grass at a time. Cut thicker grass at a higher Cutting Height, or cut a narrower swath. Do not force the Mower forward in thick grass; rather, cut it with a couple of passes. Your NEUTON Mower will do a better and safer job when cutting at a steady pace.
- Mowing dense grasses, such as St. Augustine or Bermuda grass, requires more power to cut properly. For these grasses, it may be necessary to move more slowly to ensure a quality cut.
- Mow as often as needed so that you are only cutting one (1) to two (2) inches of grass each mowing session. Trying to cut more than two (2) inches at a time will drastically reduce the charge life of the Battery and quality of the cut.
- For the healthiest lawn, avoid removing more than one third (1/3) of the leaf blade during any one mowing session. When more than one third (1/3) of the leaf blade is removed, the grass plant produces less food for itself and therefore becomes weaker and more susceptible to disease and insect damage.
- Frequent stopping and restarting of the Mower will use additional Battery energy. Try to work continuously and smoothly when mowing.
- Keep your Mower Blade sharp. A sharp Blade cuts the grass quickly and cleanly, using less of the Mower’s power, which conserves Battery life. For best results, inspect the Blade often and have an extra, sharp Blade ready to install as a replacement while you have the dull Blade sharpened.
- Mow across slopes; never up and down.
Chapter 5: Charging and Caring for the Battery

Before charging the battery, read all instructions and cautionary markings in this manual and on your mower. Do not operate your mower until you have read and understand all instructions and the battery is fully charged.

The Battery

The NEUTON Mower comes with a sealed, lead acid Battery already installed at the factory. The Battery is 24 volts and rated at 10 amp-hours. The Battery should not leak, regardless of the position in which it is stored. Read “Handling the Battery Safely” in Chapter 2 for additional information.

The Battery is completely maintenance free. You never need to add water. However, as with all rechargeable Batteries, after years of use they will eventually need replacement. With proper care, this Battery may last three (3) to five (5) years. Please refer to “Chapter 7: Maintaining and Storing Your NEUTON Mower” for more information.

• DO NOT STORE, OR CHARGE THE BATTERY NEAR CHILDREN, PETS OR CLOSE TO A SOURCE OF HEAT, SPARKS, OPEN FLAME, OR ON THE FLOOR AS IT MAY BE DAMP OR SUBJECT TO ACCIDENTAL FLOODING. IN ADDITION, NEVER EXPOSE THE BATTERY TO ABNORMAL SHAKING OR SHOCKS.

• CHARGE THE BATTERY IN A WELL VENTILATED AREA.

• REGULARLY INSPECT THE EXTERNAL APPEARANCE OF THE BATTERY AND NEVER USE, OR CHARGE A BATTERY THAT SHOWS CRACKS, CHANGES IN SHAPE, LEAKS, OR IS OBVIOUSLY DAMAGED. IF THE BATTERY BECOMES HOT TO THE TOUCH DURING CHARGING, THIS MAY ALSO BE A SIGN OF A DAMAGED BATTERY.

• NEVER ATTEMPT TO ALTER OR OPEN THE BATTERY, AS THIS WILL VOID YOUR BATTERIES WARRANTY. USE NORMAL HOUSEHOLD VOLTAGE (110 VOLTS) WHEN CHARGING THE BATTERY. PLUG THE CHARGER DIRECTLY INTO THE ELECTRICAL OUTLET.

• REGULARLY INSPECT THE CHARGER RECEPTACLE OF THE BATTERY AND NEVER USE, OR CHARGE A BATTERY THAT HAS VISIBLE DAMAGE OR DEBRIS WITHIN THE CHARGER RECEPTACLE. IF THERE IS DEBRIS PRESENT, PLEASE USE CAUTION TO REMOVE THE DEBRIS. DO NOT REMOVE THE DEBRIS WITH ANY METALLIC OBJECTS, DAMP OR FLAMMABLE ITEMS, OR ITEMS THAT MAY BECOME LODGED IN THE CHARGER RECEPTACLE AS THIS MAY CAUSE A FIRE, OR EXPLOSION OF THE BATTERY. IF YOU OBSERVE DAMAGE TO THE CHARGER RECEPTACLE, PLEASE DISCONTINUE USE IMMEDIATELY.

• RISK OF ELECTRIC SHOCK; DO NOT TOUCH THE NON-INSULATED PORTION OF THE OUTPUT CONNECTOR OR THE NON-INSULATED BATTERY TERMINAL.

• USE THE NEUTON 24-VOLT CHARGER ONLY WITH THE NEUTON 24-VOLT BATTERY. USE OF OTHER CHARGERS OR THE NEUTON 24-VOLT CHARGER WITH OTHER TYPES OF BATTERIES MAY RESULT IN BURSTING OF THE BATTERY, WHICH COULD CAUSE PERSONAL INJURY AND PROPERTY DAMAGE.

Tips

• Under normal conditions, the Battery charge should last for approximately forty-five (45) to sixty (60) minutes per use. The length of time depends on the length, density, and dampness of the grass. If you generally intend to use your Mower and Trimmer for a longer duration, NEUTON Power Equipment recommends that you purchase an extra Battery. That way, you could have a second fully charged Battery ready so you can continue mowing.

• It may take up to five (5) charging and discharging cycles before your Battery provides maximum life.

• A Battery may last much longer if you charge it as soon as it starts to lose power and not let it completely discharge. You should not try to coax a little more power out of your Battery.
Charging the Battery

**NOTICE**

**NOTICE**

WHILE THE BATTERY IN YOUR MOWER WAS CHARGED AT THE FACTORY, YOU MUST RECHARGE IT FULLY TWENTY (20) TO THIRTY (30) HOURS BEFORE USING YOUR MOWER. OTHERWISE, YOU MAY DECREASE THE CHARGING CAPACITY OF THE BATTERY. AGAIN, USE ONLY THE CHARGER SUPPLIED WITH THE MOWER.

**WARNING!**

*NOTE:* When using an extension cord with your Charger, use a heavy-duty extension cord of a type “suitable for outdoor use” (although you should never charge the Battery in the open outdoors).

**NOTICE**

ALWAYS CONNECT THE CHARGER TO THE BATTERY FIRST, AND THEN PLUG THE CHARGER INTO THE WALL OUTLET. WHEN UNPLUGGING, REVERSE THE PROCESS; UNPLUG THE CHARGER FROM THE WALL OUTLET FIRST, AND DISCONNECT IT FROM THE BATTERY. THE OPTIMAL AMBIENT TEMPERATURE FOR CHARGING OF THE BATTERY IS BETWEEN +32°F (0°C) AND +104°F (+40°C) AND THE OPTIMAL AMBIENT TEMPERATURE FOR STORAGE OF THE BATTERY IS BETWEEN +5°F (-15°C) AND +104°F (+40°C).

You must charge the Battery before using your Mower for the first time and after every use. Always charge the Battery out of the Mower.
Charging with the Battery out of the Mower

1. Remove the Battery from the Mower.
2. Plug the round Charger Connector into the Charger Receptacle on the Battery (Figure 30).
3. Plug the 110V Charger plug into a wall outlet. The RED light on the Battery will illuminate indicating a connection between the Battery and the Charger and that the Battery is charging.
4. After twenty (20) to thirty (30) hours, the Battery should be completely recharged. The LED on the Battery will not turn OFF or change colors.

**NOTE:** The amount of time needed to completely recharge the Battery depends on the level of discharge during use. If you used the Battery for the full forty-five (45) to sixty (60) minutes, or have drained the Battery to the point where the machine will no longer operate, it will take almost the full thirty (30) hours to recharge the Battery completely.

5. Remove the Charger from the Battery and from your standard 110-Volt wall outlet and place both the Battery and the Charger in a DRY environment for storage until you need them again.

**NOTE:** For the first five (5) hours, the Charger may be warm to the touch. This is normal and does not indicate a problem.

---

**NOTICE**

ALWAYS KEEP THE BATTERY IN A DRY PLACE.

---

**Disconnecting the Charger**

Remember to disconnect the Battery from the Charger using this sequence:

1. Pull the plug from the Charger out of the wall outlet.
2. Disconnect the Charger from the Battery.

---

**WARNING!**

ALWAYS DISCONNECT THE CHARGER FROM THE ELECTRICAL (WALL) OUTLET FIRST, AND THEN DISCONNECT THE ROUND CHARGER PLUG FROM THE BATTERY. IF YOU REMOVE THE ROUND CHARGER PLUG FIRST, THE EXPOSED CONNECTOR COULD BE ACCIDENTALLY SHORT-CIRCUITED BY FOREIGN MATERIAL, WHICH MIGHT CAUSE A FIRE.
Recharging after each use of the Mower

Always fully recharge the Battery immediately after each use; no matter how short a time you used it. Fully recharge even if the Status Indicator Light on the Mower is still green. This is important in order to maintain maximum Mower performance and extend the useful life of the Battery. If you are using the Mower and the green Indicator Light goes out, suggesting low Battery charge, then you should stop using the Mower and either replace or recharge the Battery.

Unlike “Smart Batteries” found in devices such as cell phones, you should NOT run the NEUTON Mower Battery until completely drained. You will reduce the long-term performance of the Battery if allowed to run to full depletion.
Recharging to Full Charge for Off-Season Storage

**NOTICE**
IF A DEPLETED BATTERY IS STORED, THE CHARGING CAPACITY OF THE BATTERY WILL DECREASE AND WILL SUBSEQUENTLY CAUSE PERMANENT DAMAGE TO THE BATTERY. YOU MUST RECHARGE THE BATTERY PRIOR TO STORAGE.

At the end of your mowing season, remove the Battery from the machine and follow the charging procedures as outlined above. Once charging is complete, remove the Charger from the Battery and from your standard 110-Volt wall outlet. Store the Battery in a DRY environment with temperatures between +5°F (-15°C) and +104°F (+40°C), unplugged from the Charger and separate from the Mower. Every one (1) to two (2) months thereafter and just prior to the first mowing of the season, you should completely charge the Battery again for optimal performance and life.

For Off-Season storage of the Battery, it is important that the Battery is fully charged. Consider these facts when choosing your method of storing the Battery:

- Leaving the Battery with a full charge is the best way to store the Battery.
- Over time, Batteries will slowly discharge.

For more information on storing your Mower, see “Chapter 7: Maintaining and Storing your NEUTON Mower”.

   

Caring for the Battery

You can lengthen the life of your Battery by following some simple guidelines.

- Always charge the Battery indoors in a garage or other covered area where it will be dry and protected from the weather.
- Only charge the Battery when the temperature is at least 32ºF (0ºC) – above freezing – but not more than 104ºF (40ºC). Charging in lower or higher temperatures can be harmful to the Battery.
- Always keep the Battery away from water, heat sources (stoves, radiators, open flame, etc.), and hazardous chemicals.
- Use only an approved 24-Volt NEUTON Charger to charge the Battery. Make sure that the NEUTON Charger output voltage printed on the Charger label matches the voltage of your Battery. Use of a different Charger may not allow the Battery to fully recharge and may cause a fire or explosion. Use of a non-approved NEUTON Charger will void your warranty.
- Never use the Charger on any other product. Never operate a damaged Charger. If there is damage to a cord or the Charger Unit, replace the Charger or have it repaired.
- When storing the Battery after removing it from the Mower, follow the storage guidelines in “Chapter 7: Maintaining and Storing Your NEUTON Mower”.
- For long-term storage, please see “Recharging to Full Charge for Off-Season Storage” on page 30.
- If the Motor will not run after you have fully charged the Battery, consult the techniques in “Chapter 8: Troubleshooting Tips”. If you still need help, call Toll Free 1-866-NEUTON1 (638-8661) and one of our Technical Support Representatives will be happy to assist you.

Recycling your Used Battery

**WARNING!**

NEVER ATTEMPT TO DISPOSE OF YOUR BATTERY IN A FIRE. THE CELLS MAY EXPLODE.

**NOTICE**

PLEASE DISPOSE OF USED BATTERIES RESPONSIBLY, ACCORDING TO YOUR LOCAL HAZARDOUS MATERIALS REGULATIONS. NEVER THROW AWAY USED BATTERIES IN YOUR HOUSEHOLD TRASH.

We have partnered with East Penn Manufacturing, one of the leading producers of lead-acid batteries in the U.S., to recycle your Battery when it reaches the end of its life. East Penn has nearly 100 distribution centers throughout the U.S. and Canada that will accept your Battery for recycling. East Penn will separate and reuse everything in your old Battery: the plastic cover, the lead, and even the Battery acid using a patented process. To find the location of the East Penn distribution center nearest you, visit <http://www.dekabatteries.com>. You can also visit the Web site of Earth 911 for more information [www.earth911.org]. Once there, click the Household tab at the top of the page and then enter your zip code. The site lists recycling centers located near you. You can also visit our website [www.neutonpower.com] and click on “Customer Service” to find distribution centers across the country that will accept your Battery for 100% recycling of the plastic, lead, and acid.

For a fee, you can recycle your Batteries with the International Metals Reclamation Company. Visit them at [www.inmetco.com] and click Services; or contact them at:

INMETCO, P.O. Box 720, 245 Portersville Road, Ellwood City, PA 16117, (724) 758-2825; fax (724) 758-2845

To learn more about hazardous waste recycling, visit the Web site for Battery Council International [www.batterycouncil.org] or for the Environmental Protection Agency [www.epa.gov].
Chapter 6: Optional Attachments

You can purchase Optional Attachments for your NEUTON Mower. To order any of these Optional Attachments, please visit our website at www.neutonpower.com or call Neuton Power Equipment Toll Free 1-866-NEUTON1 (638-8661).

Your NEUTON Mower shipped with the Side Discharge Chute, allowing you to discharge grass clippings as the standard mowing mode, a rear Bagger which allows you collect grass clippings, and a Mulching Plug that allows you to mulch clippings.

NEUTON Trimmer

The NEUTON Trimmer is a unique attachment that, when used with your NEUTON Mower (Figure 31), enables you to trim and edge your lawn and yard without having to buy a separate trimmer and edger – it’s like having three (3) machines in one (1). The Trimmer simply plugs into the front of your Mower.

The description and operation of the Trimmer is in Chapter 9 of this manual. For more information about the NEUTON Trimmer Attachment, please call NEUTON Power Equipment Toll Free at: 1-866-NEUTON1 (638-8661) or visit us on the Web at www.neutonowners.com.

Spare Battery

Owning a Spare Battery can be a wonderful time saver. A spare Battery allows you to quickly insert a fully charged Battery when the one you are using to mow loses its charge. Make sure you follow the charging and storage instructions as recommended in “Chapter 5: Charging and Caring for the Battery”.

Spare Aero Cutting Blade

Owning a Spare Aero Cutting Blade can make mowing more efficient. With the purchase of a replacement Blade (a new Blade Nut is included), when the existing Blade becomes dull, install the new spare Blade and then sharpen the dull Blade when you have the time. See “Sharpening the Blade” in Chapter 7 for more information.

Blade Sharpener

The NEUTON Blade Sharpener (Figure 32) is a very useful hand-held sharpener.

1. Remove the Blade and secure it in a vise.
2. Position the carbide insert of the Sharpener, which has a “−” sign, against the edge to be sharpened.
3. Press down firmly and pull the Sharpener from the inside edge toward you. Usually 3 or 4 strokes is sufficient. Repeat for the opposite end of the Blade. It’s as simple as that!
Utility Shelf

The Utility Shelf attaches to the Handlebar frame (Figure 33) and is a convenient place to hold small tools or a water bottle while you are mowing.
Chapter 7: Maintaining and Storing Your NEUTON Mower

This chapter explains how to clean your Mower; change, sharpen, and balance the Blade; and store your Mower for long term.

Servicing Your Mower

⚠️ WARNING! ⚠️

- NEVER MAKE ADJUSTMENTS OR REPAIRS WITH THE MOTOR RUNNING. ALWAYS STOP THE MOTOR, WAIT FOR THE BLADE TO STOP MOVING, REMOVE THE SAFETY KEY AND REMOVE THE BATTERY TO PREVENT ACCIDENTAL STARTING.

- NEVER TAMPER WITH SAFETY DEVICES. CHECK THEIR PROPER OPERATION REGULARLY.

- NEVER ATTEMPT TO MAKE WHEEL-HEIGHT ADJUSTMENTS WHILE THE MOTOR IS RUNNING.

- GRASS CATCHER COMPONENTS ARE SUBJECT TO WEAR, DAMAGE, AND DETERIORATION, WHICH COULD EXPOSE MOVING PARTS OR ALLOW OBJECTS TO BE THROWN. CHECK COMPONENTS FREQUENTLY, AND REPLACE THEM WITH THE MANUFACTURERS RECOMMENDED PARTS WHEN NECESSARY.

- CHECK THE BLADE AND MOTOR MOUNTING BOLTS AT FREQUENT INTERVALS FOR PROPER TIGHTNESS. USE ONLY AUTHORIZED NEUTON REPLACEMENT PARTS.

⚠️ CAUTION! ⚠️

- KEEP YOUR MOWER FREE OF GRASS, LEAVES, OR OTHER DEBRIS BUILD-UP.

- ALLOW THE MOWER TO COOL FOR AT LEAST FIVE (5) MINUTES BEFORE SERVICING OR STORING.

- THE MOWER BLADE IS SHARP, IT CAN AND WILL CUT. WRAP THE BLADE OR WEAR GLOVES, AND USE EXTRA CAUTION WHEN WORKING ON IT.
Cleaning Your Mower

Periodically clean your Mower to ensure peak performance.

**WARNING!**

BEFORE PERFORMING THE FOLLOWING CLEANING PROCEDURES, REMOVE THE SAFETY KEY AND BATTERY TO PREVENT ACCIDENTAL STARTING.

**Supplies Needed:**
- Clean, damp cloth or sponge
- Mild soap or detergent (if needed)
- Soft nylon brush (if needed)

1. Using a damp cloth or sponge with a mild soap or detergent, clean the Mower. Never use water, gasoline, solvents, or other petroleum-based or solvent-based products when cleaning – remember that this is an electric Mower.

2. Use a soft nylon brush or non-metallic scrubbing pad to remove any clippings that have accumulated on the underside of the Deck and in the Side Discharge Chute. Do not use a wire brush; it will scratch and harm the surface of your Mower.

3. You may use water to clean the Rear Bagger when not attached to the Mower. For proper grass collection, make sure the Bagger is clean and the mesh holes are unclogged. Allow the Rear Bagger to dry thoroughly before using it again.

**NOTE:** A wet Rear Bagger will clog quickly and hamper grass collection.

**Cleaning the Handlebar**

Remember to clean and lubricate the Handlebar on your Mower at least once a year or whenever grime builds up on the sliding parts of the Handlebar.

**WARNING!**

BEFORE PERFORMING THE FOLLOWING CLEANING PROCEDURES, REMOVE THE SAFETY KEY AND BATTERY TO PREVENT ACCIDENTAL STARTING.

**Supplies Needed:**
- Clean cloth or paper towel
- WD-40® or similar lubricant
NOTICE

- USE ONLY LUBRICANTS THAT ARE COMPATIBLE WITH ELECTRICAL COMPONENTS SUCH AS WD-40®.
- NEVER USE SILICONE OR GRAPHITE BASED LUBRICANTS.

1. Spray a small amount of WD-40® or similar lubricant on a paper towel or clean cloth.
2. Clean both sides all along the top and sides of the orange Control Bar (Figure 22 on page 19).
3. Slide the Start Knob (Figure 28 on page 25) to the left and squeeze the orange Control Bar up into the top of the Handlebar as if you were starting the Mower (Figure 29 on page 25).
4. Holding the orange Control Bar in this position, clean the inside side walls of the Handlebar where the orange Control Bar slides up and down.
5. Operate the orange Control Bar several times to insure that it is moving freely and properly returns to the OFF (down) position.

WARNING!

IF YOU HAVE QUESTIONS OR IF THE ORANGE CONTROL BAR DOES NOT MOVE DOWN EASILY AND SHUT OFF THE MOWER IMMEDIATELY WHEN YOU RELEASE IT, DO NOT OPERATE THE MOWER. VISIT OUR WEBSITE AT WWW.NEUTONPOWER.COM OR CALL US TOLL FREE: 1-866-NEUTON1 (638-8661). ONE OF OUR TECHNICAL SUPPORT REPRESENTATIVES WILL BE HAPPY TO HELP YOU.

Removing and Attaching the Blade

NOTICE

- YOU MUST REMOVE THE BLADE TO SHARPEN IT.
- ALWAYS CHECK THE BLADE FOR SHARPNESS, DAMAGE, AND TIGHTNESS BEFORE AND AFTER EACH USE. REPLACE THE BLADE PROMPTLY IF IT IS BENT OR DAMAGED.
- REPLACE THE BLADE WHEN WORN OR DAMAGED, BUT DO NOT USE IT FOR OVER FIVE (5) YEARS.

Tools and Supplies Needed:

- 36mm Wrench (supplied with Mower)
- 3/4” Wrench or Socket
- Torque Wrench
- Heavy Gloves

CAUTION!

WEAR HEAVY GLOVES TO PROTECT YOUR HANDS WHEN REMOVING AND ATTACHING THE BLADE.
1. Remove the Safety Key and the Battery. If you are charging the Battery in the Mower, first disconnect the Charger from the electrical (wall) outlet.

2. While holding the Handlebar (as if you were mowing) turn the Mower over on its right side to expose the Blade.

3. Place the 36mm Wrench over the Steel Hex Adapter (the large metal piece that holds the Blade in position) and place a 3/4" Socket or Wrench over the Blade Nut (Figure 34).

4. While holding the Hex Adapter in place, loosen the Blade Nut by turning counterclockwise. Be careful, hold the Hex Adapter firmly in place so that the Blade does not spin and strike your hand.

5. Remove the Blade Nut, Steel Hex Adapter, Blade, and Steel Blade Adapter in that order (Figure 35).

6. To install a sharpened Blade or a new Blade, reverse the order of step 5. Be sure to replace all parts exactly as you removed them (Figure 35) and make sure to properly seat the Blade.

**NOTE:** Be sure that the stamping on the Blade “THIS SIDE TOWARDS MOWER” is facing the Mower. Also, if replacing the Blade with a new one, use the new Nut supplied. If you assemble the Blade more than ten (10) times, replace the Blade Nut with a new one.

7. Place the 36mm Wrench over the Steel Hex Adapter, then place a Torque Wrench with a 3/4" Socket over the Blade Nut (Figure 34) and while holding the Hex Adapter in place, tighten the Blade Nut by turning clockwise to 16.6 ft-lbs. Again, be careful, hold the Hex Adapter firmly in place so that the Blade does not spin and strike your hand.

8. Make sure the Blade is firmly attached, and then turn your Mower upright.

## Sharpening the Blade

When the Blade is dull, the cut ends of the grass end up ragged and may turn brown soon after mowing. A dull blade also causes the Battery to discharge faster. When this occurs, sharpen the Blade (assuming the Blade is otherwise in good condition).

**Tools and Supplies Needed:**
- (See list on previous page)
- Fine-Toothed File or NEUTON Blade Sharpener (optional)
- Safety Glasses
- Vise

1. Remove the Blade (see steps 1 thru 5 above).

2. Secure the Blade in a sturdy Vise and while wearing Safety Glasses, carefully file the Cutting Edges of the Blade using even strokes. Be sure to file both sides and both ends equally.

3. Check the blade after sharpening to be sure it is still balanced (see next page).
Balancing the Blade

An out-of-balance Blade causes your machine to vibrate excessively. Excessive vibration may cause damage to the Mower, especially the Motor.

Because you are removing metal from the Blade, make sure to remove an equal amount from each end to keep the Blade balanced. The best way to balance a Blade is with a Blade Balancer (available at most local Hardware stores); or with a large Screwdriver, Nail, or Bolt.

Tools and Supplies Needed:

- Gloves
- Blade Balancer, or a large Screwdriver, Nail, or Bolt

1. After sharpening the Blade, hang it on the Balancer and check the level (Figure 36). If one side of the Blade tips lower than the other side, sharpen the lower end a little at time until the Blade is level (balanced).

NOTE: When sharpening a used Blade, be especially careful to keep it balanced. If in doubt, replace the Blade with a new one. Of course, you can always have a Mower Service sharpen and balance your Blade.

Figure 36
Storing Your NEUTON Mower

WARNING!
ALWAYS STOP THE MOTOR, WAIT FOR THE BLADE TO STOP MOVING, REMOVE THE SAFETY KEY AND REMOVE THE BATTERY TO PREVENT ACCIDENTAL STARTING DURING STORAGE.

Whether you store the Mower for a short or long period, always remember these important guidelines:

- Always store the Mower with a full Battery charge and follow the recharging instructions in “Chapter 5: Charging and Caring for the Battery”.

- Always store the Mower in an environment where the temperature is between +5°F (-15°C) and +104°F (+40°C). Make sure the storage temperature will never be outside these limits.

- Store the Mower in a dry environment. Water will damage the Mower and Battery.

- Do not store the Mower near chemicals, such as fertilizers. These products are often highly corrosive and may cause permanent damage to your Mower.

- Do not store the Battery in proximity to organic or other solvents.

- Always keep the Safety Key in a safe place away from children, separate of the Mower.

If you must store the Battery outside the Mower, follow these rules:

- If you will use the Battery again, give it a full charge.

- Do not store the Battery close to a source of heat, sparks, or open flame.

- The surrounding temperature range must be between +5°F (-15°C) and +104°F (+40°C).

- Do not expose the Battery to abnormal shaking or shocks.

- Store the Battery away from children and animals.

- Store the Battery in as DRY an environment as possible. Do not store it on a floor that may be damp or subject to accidental flooding.

- Regularly observe the external appearance of the Battery and keep it clean and dry. Never use a Battery that shows cracks, changes shape, leaks, or obviously damaged.

- During long-term storage of Batteries that are intended for reuse, periodically recharge the Battery, as recommended in “Chapter 5: Charging and Caring for the Battery”.

www.neutonpower.com
Chapter 8: Troubleshooting Tips

Most difficulties are easy to fix. Consult the Troubleshooting Table for common problems and their solutions. If you continue to experience problems or need repairs beyond these minor adjustments, visit our website at www.neutonpower.com or call Neuton Power Equipment Toll Free at: 1-866-NEUTON1 (638-8661) for assistance.

![WARNING!]

Always remove the safety key and battery before performing any adjustments, maintenance, or repairs to your mower.

Troubleshooting Table

<table>
<thead>
<tr>
<th>Problem</th>
<th>Corrective Action</th>
</tr>
</thead>
</table>
| The Motor fails to start with the Safety Key inserted, and the Control Bar depressed. | ⇒ Check to make sure that you properly inserted the Safety Key and the green Status Indicator Light is ON.  
⇒ Check to see if the white Button on the Safety Key has popped up; if it has, then depress the Button to reset it.  
⇒ Check that you installed the Battery correctly and that the Battery is fully charged. The green Status Indicator Light should be ON. If not, replace with a fully charged Battery or recharge the Battery.  
⇒ Check the Cable attachment to assure a proper connection. See page 14.  
⇒ Check to make sure the Mower/Auxiliary Switch is in the correct position.  
⇒ Make sure you follow the correct starting sequence of sliding the orange Start Knob to the left and squeezing the orange Control Bar.  
⇒ Possibly the Blade is obstructed. Remove the Safety Key and Battery, turn the Mower over, and check the Blade to make sure the Blade spins freely and is unobstructed. |
| The Mower stops while mowing (for reasons other than releasing the Control Bar). | ⇒ The Battery has completely depleted its charge. Recharge the Battery fully or replace it with a fully charged Battery.  
⇒ The Mower was probably overloaded. If the Status Indicator Light is out, the Circuit Breaker inside the Safety Key has tripped to protect the Motor. Reset Breaker by pushing in the white Button in the Safety Key and restart the Mower.  
⇒ The grass may be too high for the cutting height. Raise the cutting height or narrow your cutting swath and try again.  
⇒ The Blade, Mower Deck, or Side Discharge Chute probably clogged with debris. Remove the Safety Key and Battery, turn the Mower over, and clean if necessary.  
⇒ The white Circuit Breaker Button in the Safety Key may not be pushed in fully. Reset it and try again.  
⇒ If the Mower bogs down or stalls in heavy grass, raise the cutting height, walk more slowly, or cut a narrower swath. If the grass is wet, let it dry before mowing. |
| Excessive vibration or noise.                                           | ⇒ The Blade may be loose. Remove the Safety Key and the Battery; turn the Mower over and check that the Blade is securely attached.  
⇒ The Blade may be unbalanced, bent, or damaged. Remove the Safety Key and Battery, turn the Mower over, remove the Blade, and check its condition. Replace with a new Blade if necessary. |

### Charger Troubleshooting Table

<table>
<thead>
<tr>
<th>Problem</th>
<th>Corrective Action</th>
</tr>
</thead>
</table>
| **The Battery LED does not turn RED when the Charger is connected** | ⇒ Unplug the Battery Charger from your standard 110-Volt wall outlet and from the Charger Receptacle on the Battery. Inspect the Battery Charger for any visible signs of damage to the body and the cord. If you observe damage to the Battery Charger, please discontinue use.  

⚠️ **WARNING!**  
Use of a damaged Battery Charger may cause a short circuit and the potential for a fire.  

⇒ Inspect the Charger Receptacle on the Battery for any signs of visible damage or debris. If there is debris present, please use caution to remove the debris.  

⚠️ **WARNING!**  
Do not remove the debris with any metallic objects, damp or flammable items, or items that may become lodged in the Charger Receptacle as this may cause a fire, or explosion of the Battery. If you observe damage to the Charger Receptacle, please discontinue use.  

**TIP**  
Use a vacuum equipped with a non-metallic nozzle to remove debris from the Charger Receptacle on the Battery.  

**NOTE:** You can damage the Charger Receptacle by excessive force. It should not take a great amount of force to insert the round Charger Connector. Please do not force the round Charger Connector into the Charging Receptacle on the Battery.  

⇒ Verify your Standard 110-Volt wall outlet is functioning correctly by plugging a lamp or other electrical device into the same socket on the wall outlet you are intending to use. |
Chapter 9: Optional MA 3.1 Trimmer

This chapter explains the safe operation, use, and maintenance of the MA 3.1 Trimmer. Please read this entire chapter before attaching and using the Trimmer.

Safety and Information Labels

You will find the following labels on the Trimmer:

**WARNING**

- Read the operator’s manual before use.
- Do not use when children and others are around.
- Look down and behind, before and while moving backwards.
- Remove objects that could be thrown by the trimmer.
- Keep safety devices (guards, shields, switches) in place and working.
- Use caution on slopes.
- Wear safety goggles or glasses to protect eyes.

**OPERATING TIPS**

- Trimmer Cord will automatically advance every time trimmer stops and starts.
- Cord can be manually advanced by pushing white button on side of cartridge and pulling cord.
- Cord will automatically be cut to proper length when trimmer is started.
- To access trimmer cord spool, open the cartridge cover (it is not necessary to remove cartridge from trimmer to access cord spool).

BEFORE STARTING

- Turn off machine and remove safety key.
- Adjust mower wheel height to the highest level.
- Check that cord cartridge and cord are properly installed on trimmer.
- Attach trimmer to mower by sliding trimmer posts into slots in front of mower (post should snap into place when properly attached).
- Turn Trimmer Head Adjustment Button and twist trimmer head to either trim or edge mode.

STARTING/STOPPING

- Insert Safety Key into slot above battery cover.
- Set Mow/Aux Switch to Aux Position.
- Follow Mower Starting/Stopping Procedures.

CHANGING BETWEEN MOW AND TRIM MODE

- Stop Motor (Motor must be fully stopped before changing modes).
- Change Mow/Aux Switch to appropriate mode.
- Start Mower.

Operating Your Trimmer Safely

Before operating your Trimmer, please review “Chapter 2: Important Safety Considerations”.

Trimming on Slopes Safely

Slopes are a major factor related to slip-and-fall accidents, which can result in severe injury. All slopes require caution. If you feel uneasy on a slope, do not trim or edge it.

Always:
• Use caution on slopes. Whenever possible, trim or edge across the face of slopes, not up and down. Exercise caution when changing direction on slopes.
• Remove objects such as rocks and tree limbs, or any other potential object possibly thrown by the Cutting Cord. Objects struck by the Cord can cause severe injuries.
• Watch for holes, ruts, or bumps. Tall grass can hide obstacles.

Never:
• Never trim or edge near drop-offs, ditches, or embankments. You could lose your footing or balance.
• Never trim or edge steep slopes or any other areas where stability or traction is in doubt.
• Never trim or edge on wet grass. Unsure footing could cause you to slip.

Using the NEUTON Trimmer

The NEUTON Trimmer (powered by your NEUTON Mower) is a versatile machine that quickly and easily attaches to the front of the Mower (Figure 37) to trim and edge your lawn without your having to buy both a separate Trimmer and Edger. The Trimmer can cut an eleven (11) inch swath.

The NEUTON Trimmer ships fully assembled and ready to use. Also included are two (2) replacement Cord Spools for the Trimmer.
Attaching, Removing and Using the Trimmer

Attaching and removing the Trimmer is quick and easy.

**Attaching the Trimmer**

1. Adjust the Mower Cutting Height Lever to position 6; this sets the Cutting Height to the highest level.
2. Slide the Trimmer Posts into the slots in the front of the Mower (**Figure 38**). The Posts will snap into place when fully inserted.
   
   **TIP** Hold the Mower so that it will not roll backward (**Figure 38**) when inserting the Trimmer.

**Removing the Trimmer**

1. Adjust the Mower Cutting Height Lever to position 6, setting the Cutting Height to the highest level.
2. Squeeze the Release Bar (**Figure 39**) and slide the Trimmer out of the Mower. Once it has started to slide out, you can release the Bar.
   
   **TIP** To hold the Mower so that it will not roll forward when removing the Trimmer, simply place your foot or hand on the front wheel.

---

**Figure 38**

**Figure 39**
Adjusting the Trimmer Head

Before adjusting the Trimmer, you must first decide to Edge or Trim your lawn.

To set the Trimmer Head for edging or trimming, turn the orange Adjust Knob on top of the Trimmer counterclockwise and rotate the Trimmer Head to the Trim or Edge position (Figure 40 or 41).
Starting the Trimmer

The Battery in the NEUTON Mower powers the Trimmer, making the cutting cord spin. Make sure the Battery has a full charge before you begin.

NOTICE

- STARTING, STOPPING, AND RESTARTING AN ELECTRIC MOTOR REPEATEDLY WITHIN A FEW SECONDS CAN GENERATE A GREAT DEAL OF HEAT AND DAMAGE THE MOTOR. TO PROTECT THE LIFE OF YOUR NEUTON TRIMMER, ALWAYS WAIT AT LEAST FIVE (5) SECONDS AFTER STOPPING BEFORE RESTARTING THE TRIMMER.
- THE CUTTING CORD ALWAYS TURNS WHEN THE MOTOR IS RUNNING; THERE IS NO CLUTCH TO ALLOW THE CORD TO STOP ROTATING WHILE THE MOTOR IS RUNNING.

1. Set the Mower/Auxiliary Switch to Auxiliary (Figure 25 on page 21).
   
   NOTE: The Cutting Blade on the Mower does not turn when the Mower/Auxiliary Switch is to Auxiliary.

2. Insert the Safety Key into the Key Slot. The green Status Indicator Light should come ON.

3. Slide the orange Start Knob to the left and then squeeze and hold the orange Control Bar (Figures 28 & 29 on page 25). The Trimmer motor will now start and run for as long as you are squeezing the Control Bar.

Stopping the Trimmer

Simply release the Control Bar to Stop the Trimmer.

NOTICE

THE TRIMMER WILL CONTINUE TO ROTATE FOR A COUPLE OF SECONDS AFTER YOU RELEASE THE CONTROL BAR. WAIT FOR THE MOTOR TO STOP BEFORE MOVING THE MOWER. REMEMBER TO WAIT AT LEAST FIVE (5) SECONDS AFTER STOPPING BEFORE YOU RESTART THE TRIMMER MOTOR.

When you are finished trimming or edging, remember to remove the Safety Key.
Advancing the Cord

Each time the Trimmer starts or comes to a complete stop, the Trimmer’s Cutting Cord automatically advances and cuts itself to 5-1/2”; resulting in an eleven (11) inch cutting swath.

You can also manually advance the Cord.

1. Release the orange Control Bar to stop the Trimmer motor and remove the Safety Key.
2. Push in the white Button on the side of the Spool Housing (Figure 42) and pull the Cord to advance it. The Cord advances in small increments so you might have to push the Button a few times.

**NOTE:** Try not to advance the Cutting Cord past the Trimmer Shield. If you do pull out too much Cord, the Cutter on the Trimmer Shield automatically trims the length of the Cord (Figure 43).

![White Button](image1)

**WARNING!**

BE CAREFUL, THE EXCESS CORD WILL FLY OFF WHEN YOU START THE TRIMMER AND COULD BE DANGEROUS.

![Cord Cutter](image2)

Safety Tips for using the Trimmer

Following these tips will provide safe operation and enhance the performance of your Trimmer:

- Always stop the motor before toggling the Mower/Auxiliary Switch.
- You can adjust the cutting height of the Trimmer by raising or lowering the Mower’s cutting height level. Make sure you first stop the motor and remove the Safety Key before changing the height.
- Stop the motor and remove the Safety Key before changing the position of the Trimmer Head or Housing.
- The Battery will drain more quickly in the Edger mode. You can realistically expect up to 45 minutes of use in the Edger mode, and approximately one (1) hour in Trim mode. This is when having an extra charged Battery comes in handy. Be sure to remove the Safety Key when you change the Battery.
- Be sure to clean the Trimmer Head frequently keeping the cooling vents and air intake holes free of debris.
Maintaining and Storing the NEUTON Trimmer

This section explains how to replace the Spool, change the Spool Housing, clean, and store the Trimmer.

**WARNING!**

ALWAYS REMOVE THE SAFETY KEY BEFORE REMOVING THE TRIMMER FROM THE MOWER, PERFORMING ANY ADJUSTMENTS, MAINTENANCE, SPOOL CHANGES, OR REPAIRS TO THE TRIMMER. ALLOW THE TRIMMER TO COOL AT LEAST FIVE (5) MINUTES BEFORE SERVICING OR STORING.

**Replacing the Spool**

Replace the Spool when the Cord runs out.

1. Using two (2) fingers, press the Clips on the side of the Spool Housing (Figure 44) and push them UP slightly towards you. The green Cover will pop up part way and then remove it. The outer black Spool Housing stays on the Trimmer.

2. Lift out the empty Spool.

3. Thread the end of the new Cord through the metal opening in the Spool Housing.

4. Insert the new Spool with the printed side facing out (so you can read it).

5. Replace the green Cover. Make sure the Clips in the Cover align with the Slots in the Spool Housing. If they don’t, press the Clips and turn the Spool Housing until the Clips and Slots align. The Clips must snap securely into place.

**Replacing the Spool Housing**

You only need to replace the Spool Housing if it is damaged or cracked. You do not need to remove the Shield to replace the Spool Housing. If the Cord runs out, only change the Spool.

1. Remove the green Spool Cover. See “Replacing the Spool” for details.

2. Using a flat-head Screwdriver, hold the Shaft in place (Figure 45) so it won’t turn and unscrew (counterclockwise) the Spool Housing with your hand and remove it.

3. Install a new Spool Housing in the reverse order and securely tighten by hand.
Cleaning the Trimmer

Periodically clean the Trimmer to ensure peak performance.

**Supplies Needed:**

- Clean, damp cloth or sponge
- Mild soap or detergent (if needed)
- Soft nylon brush (if needed)

1. Remove the Safety Key and remove the Trimmer from the Mower.
2. Using a damp cloth or sponge with a mild soap or detergent, clean the Trimmer. Never use water, gasoline, solvents, or other petroleum-based or solvent-based products when cleaning – remember that this is an electric Trimmer.
3. Use a soft nylon brush or non-metallic scrubbing pad to remove any clippings that have accumulated on the Trimmer and underside of the Trimmer Shield. Do not use a wire brush; it will scratch and harm the surface of your Trimmer.
4. Remove any grass or weeds that might have wound around the Spool.
5. Store the Trimmer indoors in a dry place and out of the reach of children.
## Parts List - NEUTON CE5.2 Mower

2-Year Limited Warranty

Terms and Conditions

The NEUTON® CE5.2 Battery-Powered Mower is warranted for two (2) years, one (1) year for the NEUTON® Attachments and Accessories, against defects in materials or workmanship when put to personal residential household use.

For the purposes of the warranty, “personal residential household use” refers to non-commercial residential use and further excludes misuse, accidents, or damage due to inadequate maintenance.

Neuton Power Equipment certifies that the NEUTON® CE5.2 Battery-Powered Mower is fit for ordinary purposes for which a product of this type is used. Neuton Power Equipment however, limits the implied warranties of merchantability and fitness in duration to a period of two (2) years, one (1) year for the NEUTON® Attachments and Accessories, in personal residential household use.

The 2-Year Limited Warranty on the NEUTON® CE5.2 Battery-Powered Mower, one (1) year for the NEUTON® Attachments and Accessories, starts on the date the machine shipped from our factory. The 2-Year Limited Warranty, one (1) year for the NEUTON® Attachments and Accessories, is applicable only to the original owner.

The owner is responsible for the performance of all the required maintenance as defined by the manufacturer’s owner manual.

The owner is responsible for the replacement of normally wearing parts including the Blade, Blade Nut, and Battery for the Mower and the Cord Spool and Spool Housing for the Trimmer. The Battery carries a one (1) year limited warranty.

During the warranty period, the owner is responsible for all shipping and transportation charges, if required.

SOME STATES DO NOT ALLOW LIMITATIONS ON THE LENGTH OF IMPLIED WARRANTIES, SO THE ABOVE LIMITATIONS MAY NOT APPLY TO YOU.

Neuton Power Equipment shall not be liable under any circumstances for any incidental or consequential damages or expenses of any kind, including, but not limited to, cost of equipment rentals, or cost of hiring services to perform tasks normally performed by the NEUTON® CE5.2 Battery-Powered Mower or the NEUTON® Attachments and Accessories.

SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS MAY NOT APPLY TO YOU.

Technical Support Hotline

Neuton Power Equipment’s objective is to have 100% satisfied customers. For that reason, we operate a 6-day-per-week Technical Support Department for our NEUTON® owners. You can access a Representative by visiting our website at www.neutonpower.com or by dialing our TOLL-FREE Hotline at 1-866-NEUTON1 (638-8661). The sole job of our well-trained and friendly folks is to ensure that you get any help you need in a timely fashion. They are there to answer all your questions including: (1) inquiries on any of the above warranties, (2) inquiries about replacement parts, and (3) your questions regarding service, maintenance, and operation.

THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE.
Daily Checklist for your NEUTON Mower

To help maintain your NEUTON Mower for optimum performance, we recommend you follow this checklist each time you use your machine.

[ ] BATTERY: Make sure the Battery has a full charge.

[ ] CLEAN: Before inserting the Safety Key, inspect the Mower Blade and clean it to remove any debris (such as grass or twigs) that might be clinging to the Blade from its last use. For the best performance and longest life of the Blade, it is best to clean the Blade of any clinging debris after each use. Always follow the safety precautions when cleaning the Blade.

Make sure the Control Bar is clean and operating smoothly. See page 36.

[ ] NOISES: If you notice anything unusual, such as a vibration or odd sound, shut the Mower down immediately. Remove the Safety Key and, following all safety procedures, inspect the Mower Blade and underside of the Mower for any obstructions.

If you cannot find the cause of the problem or are uncertain what to do, then have the Mower inspected by a qualified repair shop before using it, visit our website at www.neutonpower.com, or call Neuton Power Equipment Technical Support Department, Toll Free, at 1-866-NEUTON1 (638-8661).

[ ] MOWING: If you are uncertain whether the grass you want to cut is too long or thick for optimal cutting, then raise the Blade Height and mow the yard in multiple passes, cutting it slightly shorter each time. It is best to mow more frequently, rather than let the grass become excessively long. For the best results, see “Mowing and Lawn Care Tips” in Chapter 4.

We hope you will enjoy many years of satisfied use with your NEUTON Mower.
